

A modern building facade featuring a prominent glass lift structure. The building has large windows and a balcony with a wooden slat railing. The lift structure is a tall, narrow glass enclosure with a door at the bottom. The scene is set during the day with soft lighting.

EXPAND YOUR LIVING SPACE  
CIBES OUTDOOR LIFT CONCEPT

A view through the glass lift structure into a modern dining area. The room is furnished with a table and four white chairs. A large, illuminated pendant light hangs over the table. The interior is well-lit, contrasting with the outdoor setting.

## ENJOY YOUR OUTDOOR LIVING

For years now, we have continued to expand our living space with decks and patios, making the most of outdoor living. Installing an outdoor lift provides easy access to your garden and helps you create a seamless transition between your indoor and outdoor living areas.

Cibes outdoor lift is a weather-proof and complete outdoor lift concept. It has a space-saving, modular design, which can be adapted to blend in with any building. The lift is delivered in ready-made modules with everything you need for installation, including a ready-made lift shaft in steel or glass.

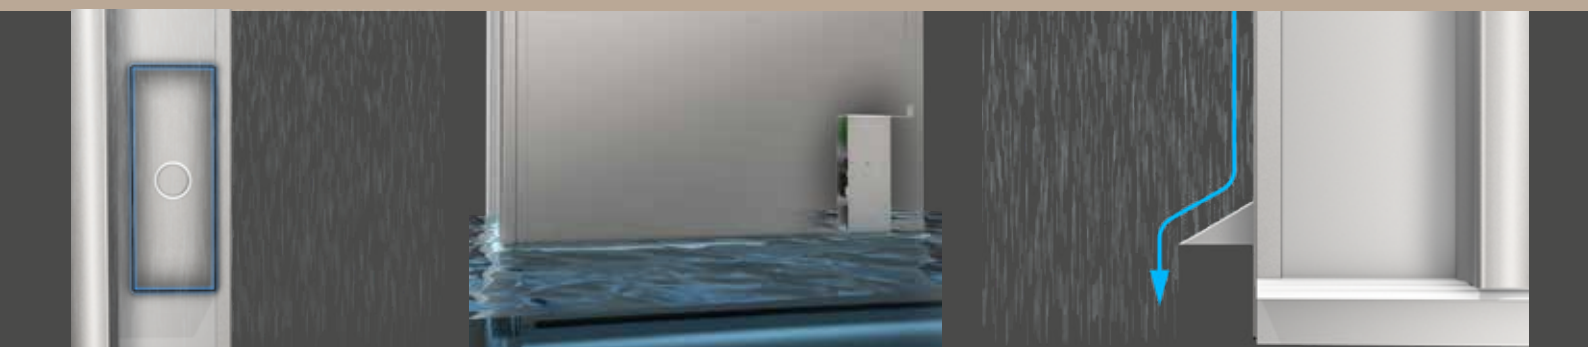

**SOLUTIONS FOR RAIN & SNOW** Our weather resistant outdoor lifts offer comfortable access to all floors and create a seamless flow between indoor and outdoor areas, that will make your interior feel more spacious.

**SNOW FENCE** – A great safety feature that prevents the sudden release of snow and ice from the roof.

**HEATING PADS** – The heating pads behind the door lock mechanisms make sure that the locks are always free from ice.

**FAN HEATER** – The fan heater ensures an ambient temperature inside the machine room in cold weather.

**CALL BUTTONS** – Sealed, weather resistant call buttons protect the door electronics against humidity.

**FLOOD PROTECTION** – The electrical compartment is placed 20 cm above the ground to be protected against floods.

**DRIP PLATE** – Placed at the base of the shaft, the drip plate leads the rainwater away from the lift.

**OUTDOOR ROOF** – The roof is designed to handle rain and snow (3kN/m<sup>2</sup>, snow zone 3). The slope of the roof can be configured in 3 directions.

**NO SKYLIFT NEEDED** – Cibes outdoor lifts can be installed without a skylift, which shortens the installation time and minimises the impact on the surroundings of the lift.

**IMMACULATE FINISH** – No rivets are visible on the inside the shaft. The corner profile includes a cover to hide all rivets, for an immaculate finish.

**GUTTER READY** – A smart solution to evacuate rainwater is to install a gutter and a drain pipe. Our outdoor roofs are available with fixings to facilitate the installation!

**RUST PROTECTION** – The bottom frame and platform are treated to withstand corrosion.

**PREPARATION BEFORE INSTALLATION** – Depending on what climate zone you live in, different preparations are required. Contact your local Cibes dealer for advice.

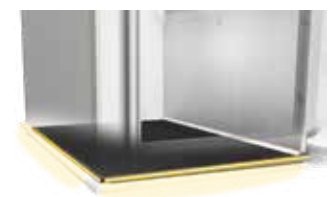

## SOLUTION FOR TEMPERATURE CONTROL

**A/C READY** – If you live in a hot climate, adding an air conditioning system to your lift is a great way to ensure both passenger comfort and lift function. Cibes outdoor lifts are available A/C ready and the option includes a connection box to facilitate installation.

**SEALED GLASS PANELS** – To resist in rainy climates, the glass panels of the lift shaft are equipped with a rubber seal to prevent water infiltration and reduce condensation.

**SAFETY EDGES WITH LED** – The safety edges of the platform floor can be equipped with LED strips to create a cool lighting effect.

# SEAMLESS TRANSITION

Our weather resistant outdoor lifts offer comfortable access to all floors and create a seamless flow between indoor and outdoor areas, that will make your interior feel more spacious.

The outdoor concept is available for platform sizes 1000×1467 and 1100×1467 mm and ensures that your lift is weather resistant.

- Slanted outdoor roof, protecting the lift from rain and snow.
- Door canopies in plexiglas or steel.
- Elegant, rust proof aluminium doors.
- Sealed, weather resistant call buttons.
- Sealed glazed shaft panels.
- Bottom frame with anti corrosive coating.
- Flood protected electrical compartment.

Our outdoor lifts are designed to function within a temperature span of approximately -10° to +30° Celsius. For more extreme climates, we offer additional options and solutions for temperature control.

**CANOPY IN STEEL** – The steel canopy is very sturdy and offers you reliable protection against rain and snow at entrance and exit.

**LED LIT CANOPY IN PLEXIGLAS** – The canopy in plexiglas looks light and elegant and shelters you from rain and light snow at entrance and exit.

The LED option offers you a nice-looking lighting effect as well as a practical, additional light source at night-time.

**ALUMINIUM DOORS** – Aluminium door AL5 (to the left) is standard for outdoor lifts. The fully glazed AL6 (to the right) is available as an option.

**COLOURFUL LIFT DESIGN** – Our lifts are available in close to 300 RAL and premium colours. Visit [www.cibeslift.com](http://www.cibeslift.com) for more information.

All Cibes lift models carry the CE mark and go through extensive testing and quality checks before leaving our factory. Our lifts are certified products that comply with European quality standards, Machinery Directive 2006/42/EC and EN 81-41. This product information is general and we reserve the right to modify product design and specifications. Deviations in colour reproduction may occur.

For critical colour matches, physical painted colour samples are recommended. The brand Cibes is owned by ©Cibes Lift Group AB.
